

Niko *Mysterious*
The art of disappearing

niko
Illuminating ideas.

Niko *Mysterious*

creates a totally **new concept** within the switching materials from Niko. With this series, the switch is mounted completely flush with the wall. Today, Niko goes even further. With **Niko Mysterious**, you control the lighting not only with the push of a button, but also by simply waving. Touching the switch is no longer necessary.

The invisible switch

Niko *Mysterious* is the first **invisible switch** that can be seamlessly incorporated into your interior. It's the dawn of a **new age**. Now no-one - architect interior designer or client needs to worry about the impact of a switch in any room..

After installation, only a discrete circle remains visible. In the dark, this circle lights with a soft and warm white glow of the LED lamps hidden behind the switch.

The wave control

activates the lighting by waving at a distance. When you are 50cm away from the switch, its edges light up and when you wave within 10cm, the switch is activated.

The **Niko** *Mysterious* wave control makes life easier. Coming home with your hands full? No longer do you have to put everything down to operate the light switch.

The push button

activates up to 4 lighting circuits by pressing the top, bottom, left or right of the button.

Niko *Mysterious* is available as a push button or wave control, as well as available as socket outlet, orientation lighting and as connection point for TV, internet and telephone.

Inspiration

Comfort and **fashion** are becoming ever more important in our living environments. Niko is responding to this shift by offering products that can be easily used and installed - with the necessary attention to sleek design and a **stylish finish**.

Niko *Mysterious* is mounted flush with the wall.

This series invites you to be creative. The switch adapts itself to the colour of the wall, just like a chameleon.

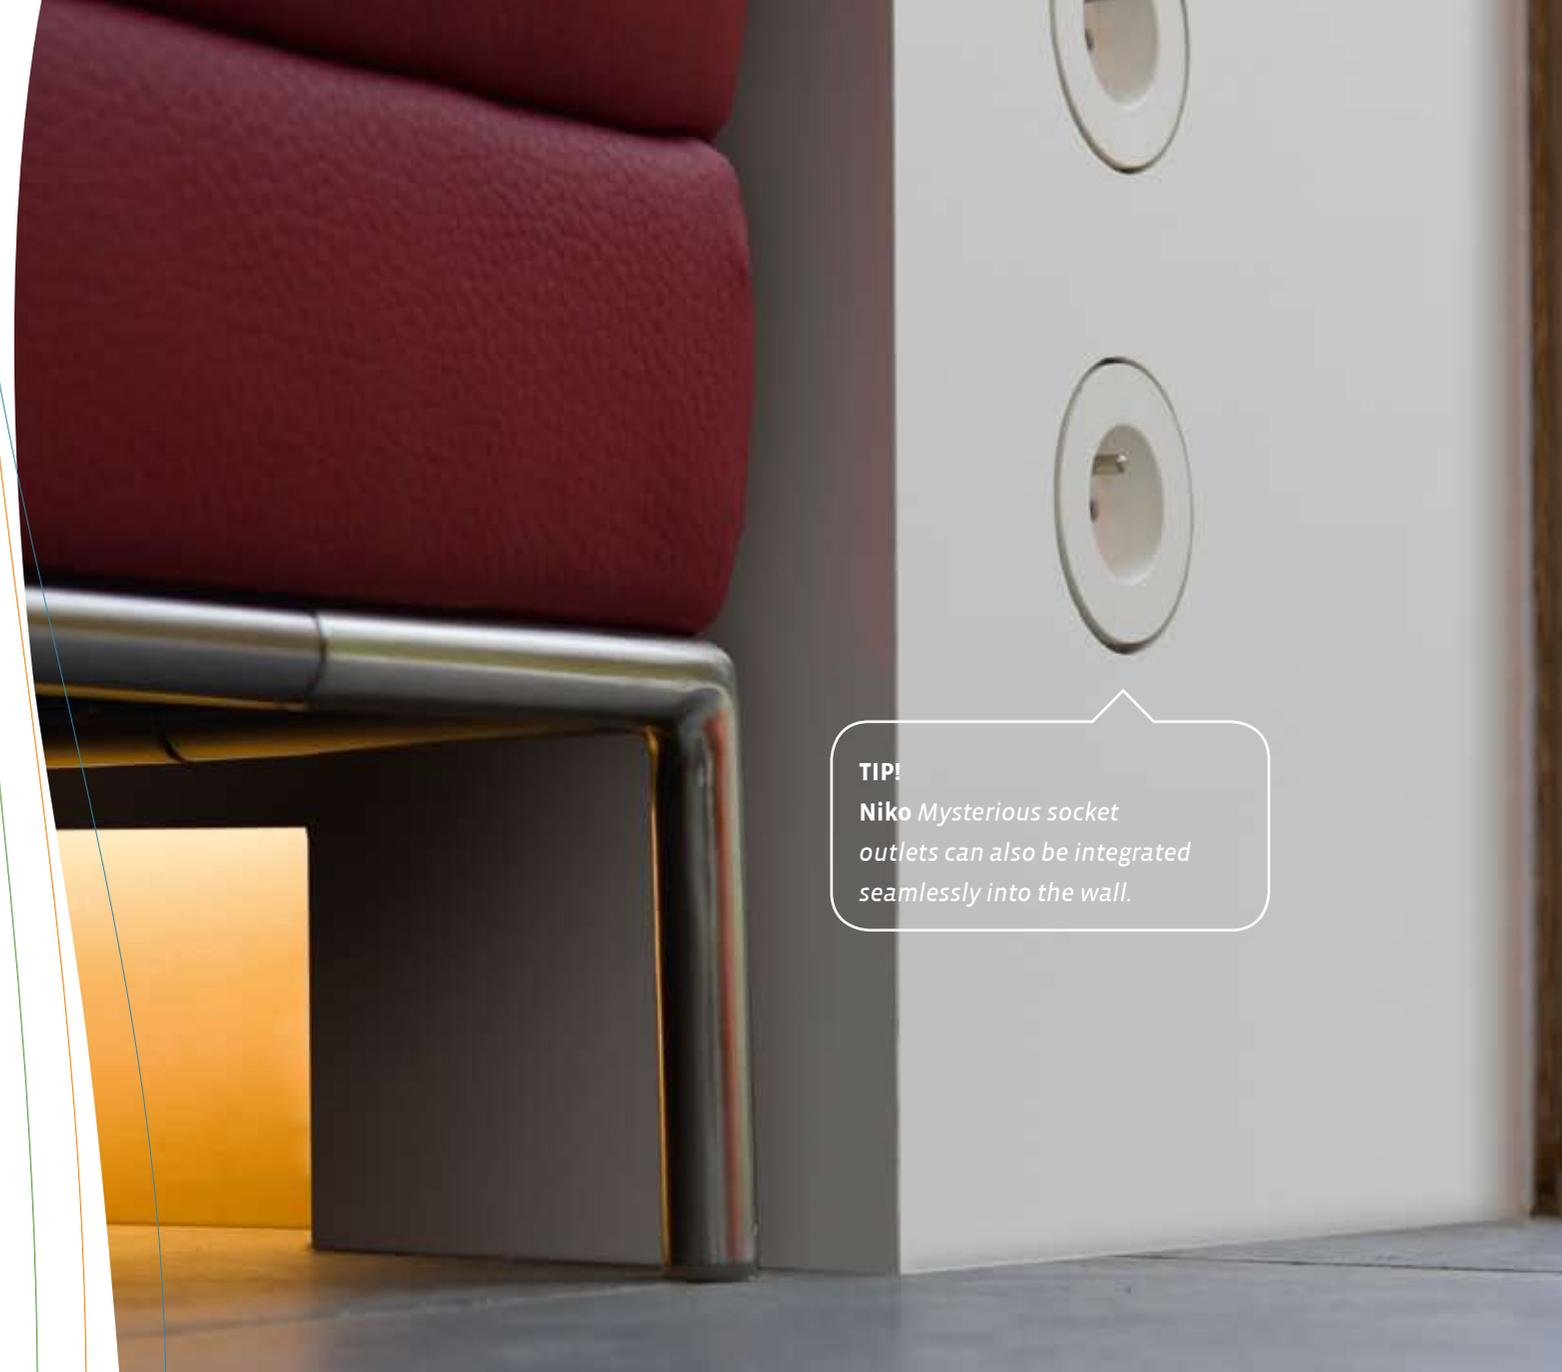

You can paint or wallpaper over this switch, but it can also be flush mounted into other materials such as wood or marble.

With the invisible **Niko** *Mysterious* push button, you can even control the lighting in a piece of bar furniture.

TIP!

Niko *Mysterious* socket outlets can also be integrated seamlessly into the wall.

Red dot award Innovation rewarded

Unique and innovative design. This is how the 'red dot' jury describes **Niko** *Mysterious*, Niko's latest switching range. With this switch, Niko was awarded one of the most renowned worldwide design awards in 2009. This prize is only awarded to exceptionally creative, innovative and high-quality products. Niko's 'out-of-the-box' thinking was internationally acknowledged and honoured.

winner 2009

This series invites you to be creative. The switch adapts itself to the colour of the wall, just like a chameleon.

Installation in brickwork

For brickwork, use a standard drill bit with a diameter of 92mm.
The blue insulation box is covered by a cardboard plaster mould.
After plastering, this cardboard is removed to install the mounting ring.
Now the orange flush-mounting box and the mechanism can be put into position. Finish as desired.

Installation in gypsum board walls

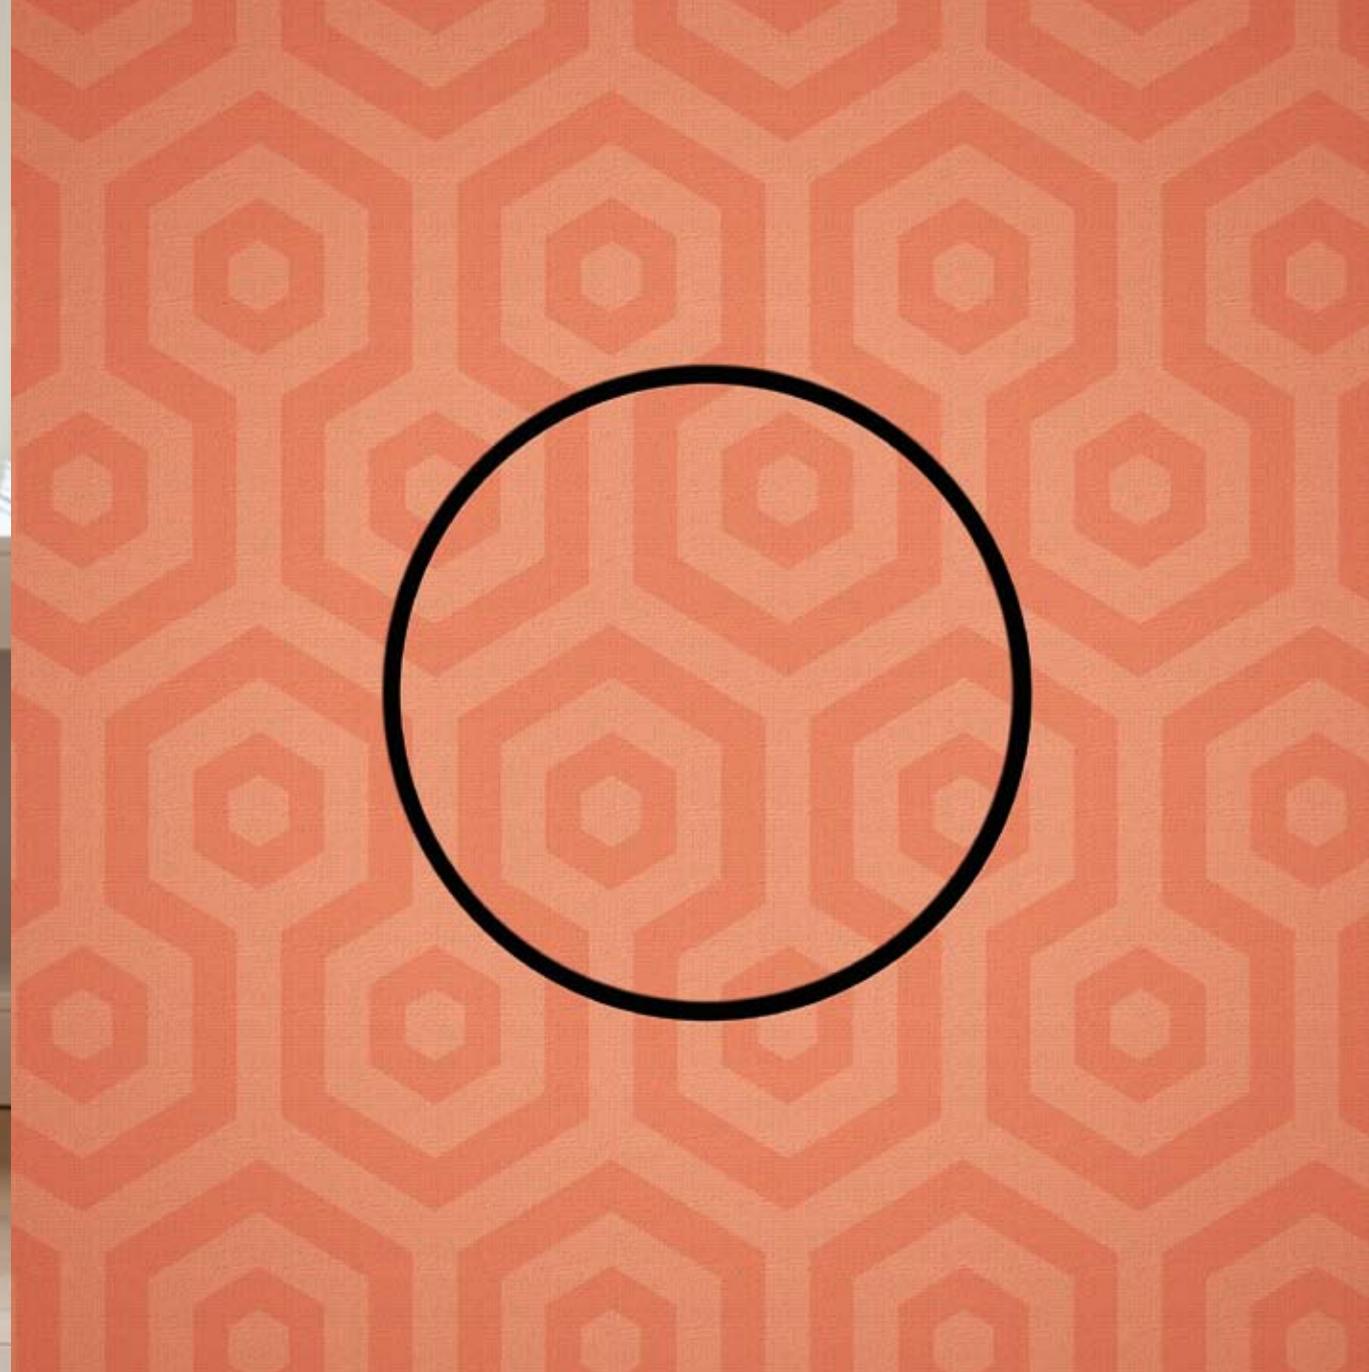

For gypsum board walls, use a hammer drill with a double saw blade (available from Niko). The mounting ring is attached with a 2-component chemical anchor (polyester-based). A protective cardboard ensures that the ring remains free of plaster residue during finishing. After installing the orange flush-mounting box, the finishing touches can be applied.

Installation in MDF

For installation in MDF, it is best to contact a professional carpenter. He can ensure the perfect finish for the cut-out in MDF.

Niko nv designs and produces advanced solutions for electrical switching material, lighting control, home automation systems, intercom systems and videophones. All over the world, both individuals and professional customers choose for Niko's quality solutions because of their ease of installation, ease of use and their design.

Niko markets its solutions all over Europe from offices in Belgium, France, the Netherlands, Slovakia and the United Kingdom, but also via distributors throughout the world.
